

Consent Letter of the Foreign Researcher

(The foreign researcher's signature is mandatory)

Project Related Information:

Project Title	Investigation of Plasma Turbulence in Open Magnetic Trap and Tokamak
Principal Investigator: Name, Surname	Irakli Nanobashvili
Project Coordinator	Sulkhan Nanobashvili
Host Institution	Andronikashvili Institute of Physics of the Iv.Javakishvili Tbilisi State University

Personal data of the foreign researcher:

Name, Surname	Vojtech Svoboda
Academic Degree	PhD
Position/Academic Position	Senior Scientist
Department, Institution	Department of Physics, Faculty of Nuclear Sciences and Physical Engineering, Czech Technical University in Prague
City, Country	Prague, Czech Republic
Contact Information (phone, fax, E-mail)	+420 737673903 svoboda@fjfi.cvut.cz

Please provide a brief description of your consulting services: the specific period(s) of performance in which you will participate in the project, activities and expected results.

I am involved in the high temperature plasma physics and technology research for more than 25 years. Currently I am responsible chief operator of the small tokamak GOLEM (previous tokamak CASTOR), the device dedicated for fusion education and basic high temperature plasma physics research with focus on the tokamak plasma edge investigations using various probe's techniques. I am ready to be the consultant of the proposed project. I can provide experimental time on the tokamak GOLEM and secure the necessary cooperation in designing and testing of the advanced electric probes to be implemented there for the proposed measurements. I am ready to participate in preparation of publications.

Please provide additional information/comments if you consider it relevant.

--

- I herewith confirm to provide consultancy during the above mentioned project implementation.
