 - Energetics infrastructure
 - Control system

Tokamak GOLEM - basic parameters:

- major radius $R = 0.4$
- plasma current $I_{pl} < 10$ kA
- toroidal magnetic field $B_{tor} < 1$ T
- electron temperature $T_e(0) < 200$ eV
- minor radius $a = 0.085$ m
- pulse length $t < 20$ ms
- plasma density $n_e = 0.2 - 3.0 * 10^{19}/m^3$
- ion temperature $T_i(0) < 100$ eV

GOLEM

The new location of the tokamak is just next to the old Prague Jewish cemetery where Rabi Loew (Golem builder) is buried, and that is why it was renamed GOLEM (and also for the symbol of potential power you get if you know the magic). Interestingly, here in Prague, where the Golem legend originated, Golem is not perceived as a symbol of evil, but rather as a symbol of power which might be useful but is very challenging to handle. To learn more of the Golem legend, see e.g. [wikipedia](https://en.wikipedia.org/wiki/Golem).

Tokamak GOLEM for Education - Historical Background

Kurchatov Institute near Moscow,
Soviet Union
1960: **TM1-MH**

Culham Centre for Fusion Energy
Great Britain
1989: **COMPASS-D**

1974

2006

Institute of Plasma Physics
Czech republic
CASTOR **COMPASS**

2008

Czech Technical University Prague
Czech republic
GOLEM

Plasma in Tokamak (GOLEM) - the least to do

- Evacuate the chamber.
- Fill in the working gas.
- Toroidal magnetic field to confine plasma.
- Toroidal electric field to breakdown neutral gas into plasma.
- Toroidal electric field to heat the plasma.
- Plasma positioning.
- Diagnostics.

Engineering scheme of the GOLEM tokamak

Unique remote operation capability

Tokamak control room

Virtual control room (remote participation)

internet

Plasma diagnostics

Control PC

OpenSSH server

WWW control interface

HTML & PHP scripts

SSH control interface

WINDOWS via putty

LINUX via ssh
or ssh+X tunnel
(advanced mode)

Data presentation

HTML (www pages)

Data handling

- *wget
- *gnuplot
- *idl
- *mathematica
- *matlab
- *etc...

Insertion - LC circuit

Tokamak GOLEM - basic

LEVEL 0

+ vacuum pumping system ($100 \text{ kPa} \rightarrow \approx 1 \text{ mPa}$)

LEVEL 0

+ working gas management (H_2 or He)

LEVEL 0

+ toroidal magnetic field B_{tor} .. plasma confinement

LEVEL 1

+ toroidal electric field E_{CD} .. plasma heating

LEVEL 1

+ toroidal electric field E_{BD} .. plasma creation

LEVEL 2

+ equilibrium magnetic field B_{EQ} .. plasma stabilization

LEVEL 3

SouthEast-Upper port - glow discharge/biasing electrode

Glow discharge/Biasing electrode - chamber view

South-Upper port: Fast camera CASIO FX1 II

 Manual,  Discharge sequence

South-Upper port: Photodiodes (I-w/o filter, II-H α filter)

SouthWest-Upper port: Interferometry - input

SouthEast-Middle port - IP camera viewing chamber

Manual, Tokamak Discharge, Glow Discharge

South-Middle port: Fast camera CASIO FX1 I

Manual,  Discharge sequence

SouthEast-Middle port: Spectroscopy fiber connecting spectrometer HR2000+ES

He spectrum No:7163

SouthEast-Bottom: Rake probe

 Description,  Discharge sequence

Rake probe (2012)

South-Bottom: vacant

SouthWest-Bottom port: Interferometry - output

NorthEast-Upper: Mirnov coils

NorthEast-Middle: Vacuum Stand

NorthEast - Bottom: Gas injection system - H₂, Air, He

Gas pressure evolution

NorthWest and North - Top and Middle: vacant

North - Bottom: vacant

NorthWest - Bottom: Vacuum Gauge & Preionization Gun

Vacuum gauge

Preionization gun

 - Energetics infrastructure**
 - Control system

Energetics infrastructure - setup

LEVEL 3

Equilibrium magnetic field

2kV power source, short circuit system and thyristors for breakdown and plasma stabilization

Thyristors for magnetic field and current drive

Charging resistor (common for all 4 circuits)

Capacitor bank for toroidal magnetic field

 13500 fd, 1300 Volt, 11500 Joule Oil-Filled Energy Storage Capacitor

Capacitor bank for current drice

Capacitor bank for breakdown

Capacitor bank for plasma stabilization

Control system for capacitor charging and vacuum management

Outline

- 1 Introduction
- 2 Overviews
- 3 Experimental setup
- 4 GOLEM tour**
 - Ports
 - Data acquisition system
 - Vacuum management system
 - Gas management system
 - Preionization
 - Energetics infrastructure
 - Control system**

Control system for Global Power source

Basic control /including triggering system

Winter school of Plasma Physics - Marianska 2011 (Tokamak, probably COMPASS, with NBI)
