backslashnewline<blockquote><i>Dear Golem team, let me congratulate you to the first plasma in Golem achieved in the frame of the
Summer Training Course 2009. This success is a result of your enormous effort to put the Golem tokamak
in operation during the period of about one year. I can confirm that the participants (students
and supervisors) found the experiments performed yesterday extremely interesting and enjoyed them very
much.</i><p align="right">On behalf of the old CASTOR and new COMPASS team, Jan Stockel</p></blockquote>backslashnewline
